# WASSER

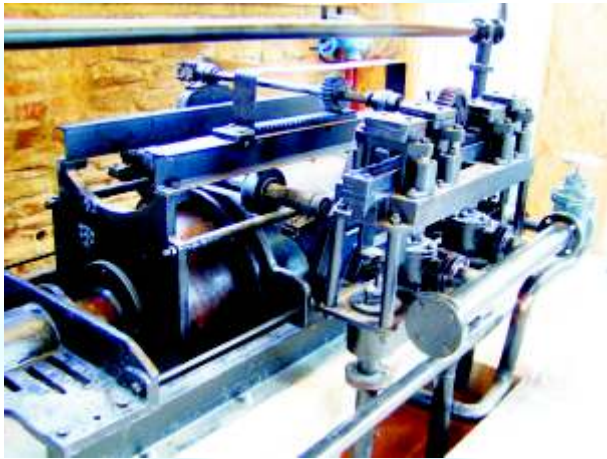

Info-Zentrum Eifel

## Wasser-Info-Zentrum Eifel?

Water is life! Nothing deserves this statement more than this combination of hydrogen and oxygen, which is the basis for every form of life on earth.

The Eifel, rich in water since primeval times, has been and still is today effected and formed by water. Not by volcanoes, geological folds, or ice times but the water of the rivers has created the relief of the Eifel, created the valleys in the former plateaus.

**Lambach-Pump**

But the primary matter of life is in danger. The reserves are becoming more and scarce, the toxins more and more present and manifold. Today it is more significant than ever to educate about the importance of water. Especially pupils shall learn about the control of water pollution through play, by learning and understanding. Also for the very small ones and the adults you will find a lot of information and entertainment here in the centre.

## What can one do here?

- **Nature+Environment**

Our water world in large aquariums; a giant globe; mini-mountains ...

- **Water Engineering**

Reservoirs for one's own operation; electricity from water at the push of a button; a watercolumn; a water works model ...

- **Blue Classroom**

School grades and other study groups experiment with this fascinating matter and discover the world of water.

- **Consumer Counselling**

Conserve drinking water, rain water use: models, construction manuals, and forms.

- **Leaflets and brochures**

A comprehensive selection regarding the many other things one can do and see in the Eifel.

- **Network**

Not only here does everything revolve around water. We have many partners in the region: Be it visits to water control dams, waterworks, or sewage treatment plants; guided lake, river, or brook excursions; informative walking-tours, lectures and seminars; you can book it all here:

**Just call!**

## Who is behind it?

The **City of Heimbach** is the owner of the centre,

and the **Karl H. Krischer-Foundation** makes it possible to operate the centre by its patronage.

The **Development Association W.I.Z.E. E.V.**

Provides support and financial assistance to the centre and is always looking for water friends to participate, think and create. Interested parties are always welcome. The membership of the association provides you with many benefits (for example free entrance to the centre). If you wish you will receive a newsletter by e-mail which will keep you up-to-date on water affairs.

And now ... **Water march**

**Model of dams with associated reservoirs**
